Create a new repository

Repositories contain a project's files and version history. Have a project elsewhere? [Import a repository](#).
Required fields are marked with an asterisk (*).

1 General

Owner *

jessielin0422-create

Repository name *

20260422web01

✔ 20260422web01 is available.

Great repository names are short and memorable. How about [vigilant-waffle?](#)

Description

0 / 350 characters

2 Configuration

Choose visibility *

Choose who can see and commit to this repository

Public

Add README

READMEs can be used as longer descriptions. [About READMEs](#)

On

Add .gitignore

.gitignore tells git which files not to track. [About ignoring files](#)

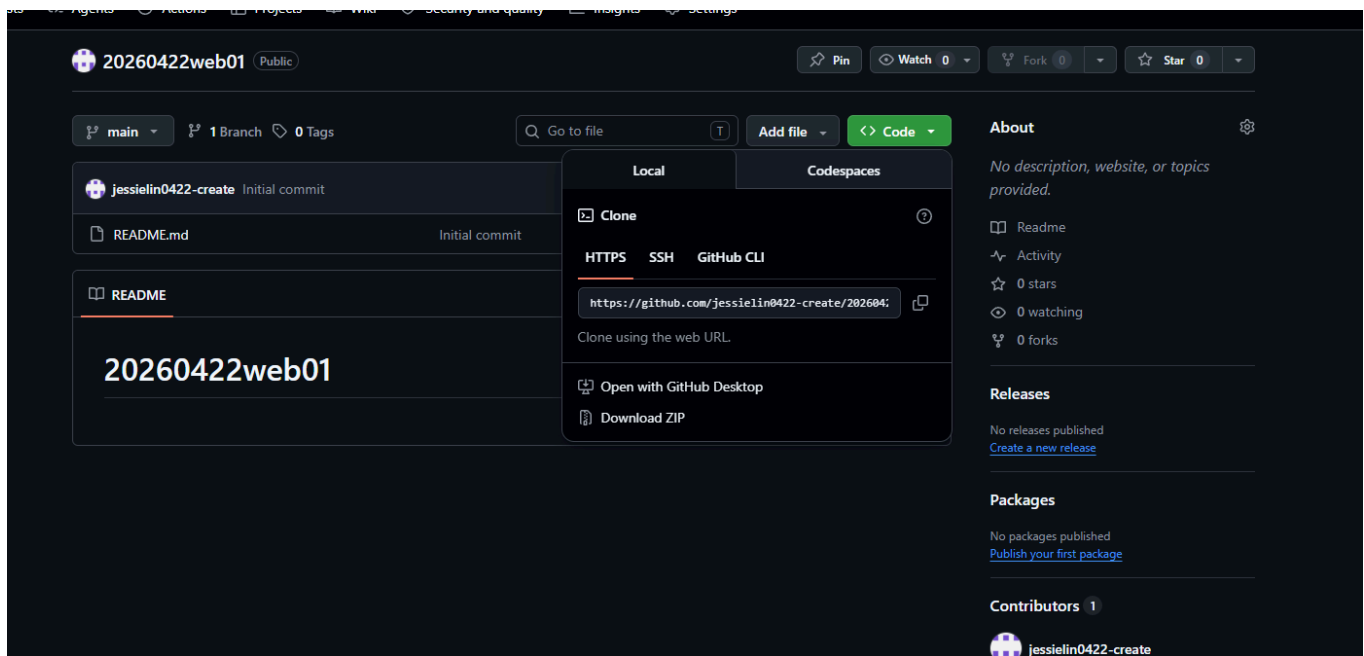

No .gitignore

Add license

Licenses explain how others can use your code. [About licenses](#)

No license
